### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ariyan et al. (U.S. Patent No. 3,621,032).

Ariyan et al. disclose polysulfur tricyclic systems wherein two substituted aromatic rings are attached to each other through two tetrasulfide links forming a central ring structure containing eight sulfur atoms (note abstract).

With respect to Claim 1, Ariyan et al. disclose the exact compound that is claimed in the current application (see column 2, lines 16-32 of this reference; see also Claims 1-4 of this reference). The Examiner would like to point out that the preamble to Claim 1 of the current application is a future intended use statement and is being given little patentable weight.

### Allowable Subject Matter

Claims 2-5 are allowed. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest a lithium battery

Art Unit: 1746

comprising a cathode, a conductive agent, a binder, an anode and a separator interposed between the anode and cathode wherein the cathode comprises a cathode active material layer that is cyclic-bis-(2,5-bis-dithio-1,4-dimethoxybenzene).
